

CHAMBERLAIN SAFE APP

Developed by the Safety and Security Department, the Chamberlain Safe App addresses student safety and keeps you aware of campus situations in real-time. Including weather-related closures and other crisis-related matters.

You can now download the Chamberlain Safe App on your phone to assist in emergency situations while on campus. In an effort to continually search for innovative ways to support our colleagues, students and members, the Adtalem Enterprise Safety and Security team has introduced the Chamberlain Safe mobile application designed specifically for Chamberlain colleagues and students.

The Chamberlain Safe App contains information you need during an emergency, like emergency plans and in-app solutions for calling emergency services but also features:

- Tips on how to be more “security smart,” including how to be more aware of your surroundings, report suspicious or illegal activity and what to do in an active shooter scenario
- First aid information, including procedures for medical events like a seizure or chest pain
- Severe weather alerts for the area

Within the app, you can also choose settings for notifications and provide feedback. The app is intended to work in conjunction with other notifications such as SIREN alerts.

If you have questions, please contact us at securityalert@adtalem.com.
